### **DETAILED ACTION**

Receipt of preliminary amendment filed 6-25-01 is acknowledged. Claims 1-26 have been canceled and new claims 27-51 have been added. Claims 27-51 are pending.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 27-31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Governor et al (EP 0 396 422; hereafter '422).

'422 discloses cinnamic acid cosmetic compositions for lightening skin. No patentable weight is afforded the process limitations and it is submitted that since the amount of cinnamate in the compositions of '422 is at least that provided in the instant specification, the amount of cinnamic acid in '422 would be effective as required in the instant claims.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Governor et al (EP 0 396 422; hereafter '422).

'422 teaches cinnamic acid cosmetic compositions for lightening skin. No patentable weight is afforded the process limitations and it is submitted that since the amount of cinnamate in the compositions of '422 is at least that provided in the instant specification, the amount of cinnamic acid in '422 would be effective as required in the instant claims. Furthermore, it is submitted that it would have been obvious to one skilled in the art at the time of the invention to adjust the amount of cinnamic acid in the compositions to provide a greater or lesser degree of UV protection based upon the motivation of a greater or lesser need/desire for more or less UV protection.

5. Claims 32-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Governor et al (EP 0 396 422; hereafter '422) in view of Szijjarto nee Auber et al (4,466,961; hereafter '961) or Governor et al (EP 0 396 422; hereafter '422) in view of McAuslan (WO 88/01166; hereafter '166).

'422 is relied upon for all that it teaches as stated previously. '422 does not teach the limitations of claims 32-51.

'961 and '166 each teach inclusion of plant hormones in topical compositions to stimulate endothelialization and angiogenesis.

Accordingly, it would have been obvious to one skilled in the art at the time of the invention to combine '422 with '961 or to combine '422 with '166 and include a plant

hormone in the composition of '422 to impart the properties disclosed in '961 and '166 upon the composition of '422 with the motivation of providing nutrients to the skin.

### **Double Patenting**

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 17-51 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-23 of copending Application No. 09/887,073. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications claim cinnamic acid compositions.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
